Journal - Office of Legislative Counsel
Wednesday - 21 June 1967

Page 3

25X1 11. [] Left with William Woodruff, Senate Appropriations Committee staff, a copy of the OCI memorandum on the Chinese nuclear test. Woodruff read the memo in my presence and said it would be very useful for him to have in connection with some of the Committee's forthcoming activities.

25X1 12. [] In connection with a letter from Senator Quentin Burdick requesting two copies of the Agency telephone directory, I met with his Legislative Assistant, James Meeker, who said these requests had gone out to all departments and agencies and added that they should not have even sent one to CIA. He fully understood the fact that the Agency's directory is classified and thanked me for dropping by to see him. I gave Meeker our telephone number and told him a little about our Office so that he might have a point of contact with the Agency in the future. I also mentioned the possibility of Senator Burdick's paying us a visit sometime in the future.

25X1 13. [] called to say that Representative Sam Gibbons had visited the Headquarters building at approximately 8:20 last night. Mr. Gibbons had a number of people in his car and merely asked for permission to drive around the grounds. When he provided identification, he was permitted to drive around the grounds but was here for only 8 or 9 minutes. 25X1

25X1 14. [] Checked with Al Westphal, House Foreign Affairs Committee staff, concerning the status of the war hazards bill (S.1785) in the Committee. Westphal said that since the Committee was now involved in the markup of the Foreign Aid bill there had been no focus on S.1785. In view of the forthcoming 4th of July recess, he does not anticipate any Committee action prior to the 15th of July.

25X1 15. [] Scott Cohen, in the office of Senator Charles Percy, called to say that the Senator had asked him to contact us for a briefing for himself (Cohen) on the reported military build up in Cuba. I told Cohen I would look into this and be in touch with him.
